### **Summary of work completed in the reporting week:**

Design the basic layout for the main landing page, creating the different github branches for the features being added to the main landing page, splitting up the work on who is adding what features so there is no confusion of overlapping. Talking about the database schema, and how we are going to connect the frontend and the backend of the website together.

### **Summary of work planned for next week:**

Start working on the database, and adding recipes/ingredients, creating several users with set login information, create 2 grocery admins with login information, create an admin with login information, and discuss our next primary focus and task for the week.
